

RIZWAN KHAN

Frontend Developer | React.js

anrizwan0305@gmail.com | +91-8237493132 | LinkedIn | Pune, India

PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Developer with 5+ years of experience architecting and delivering scalable, high-performance web applications using React.js (v16+) and Node.js. Deep expertise in component-driven architecture, state management (Redux Toolkit / Redux-Saga / Context API) . Proven track record of optimizing frontend performance, enforcing application security (OWASP Top 10, JWT, RBAC), and driving measurable business outcomes in product-based and startup environments. Adept at cross-functional collaboration using Agile (Scrum/Kanban) methodologies.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js (v16+), Next.js, React Hooks, HTML5, CSS3, Tailwind CSS, MUI, Bootstrap

State Management: Redux Toolkit (RTK), Redux-Saga, React-Redux, Context API

Performance: Code Splitting, Lazy Loading, Memoization (useMemo/useCallback/React.memo), SSR (Next.js), Lighthouse Audits, React Profiler, Webpack, Vite, Babel

Security: JWT Authentication, RBAC, OWASP Top 10, XSS/CSRF Prevention, CSP Headers, Input Validation & Sanitization

Testing & Quality: Jest, ESLint, SonarQube, Prettier, Code Reviews

DevOps & Tools: Git, GitHub, GitLab, Bitbucket, JIRA, Figma, Adobe XD, Webpack, NPM/Yarn

AI Tools: GitHub Copilot, ChatGPT, Gemini

Methodologies: Agile (Scrum, Kanban), Backlog Management, Sprint Planning, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

NGI Ventures (NextGen Invent) | Software Engineer | Oct 2024 – Nov 2025 | Remote

- Reduced average bundle size by 35% by implementing React Lazy Loading, Code Splitting, and Webpack optimization strategies, resulting in a 20% improvement in Lighthouse performance scores across all production modules.
- Accelerated UI delivery by 30% by architecting a shared reusable component (50+ components) aligned with Figma design systems, enabling consistent, pixel-perfect interfaces across teams.
- Delivered 100% of sprint milestones on time over 12 consecutive sprints by driving Agile Scrum ceremonies, backlog grooming, and proactive cross-functional communication.

Eminence Infotech Pvt. Ltd. | React.js Developer | Aug 2022 – Oct 2024 | Indore

- Cut page load time by 45% across 3 production web apps by applying Memoization (React.memo, useMemo, useCallback), Lazy Loading, and Server-Side Rendering (Next.js), resulting in a measurable improvement in user retention.
- Translated 100% of Figma/Adobe XD designs into responsive, pixel-perfect layouts using Tailwind CSS and MUI, reducing UI revision cycles by 30%.

GrowingBiz | Frontend Developer | Sep 2020 – Aug 2022 | Mumbai

- Contributed to 15+ feature enhancements and bug fixes under senior developer guidance using React.js and JavaScript (ES6+), maintaining a defect escape rate below 5%.
- Improved product stability by supporting QA testing cycles and resolving an average of 20 bugs/sprint, accelerating release velocity by 15%.

KEY PROJECTS & ACHIEVEMENTS

Unison Marketplace — Government Procurement Platform — *Tech Stack: React.js | Next.js | TypeScript | MUI | OWASP 10 | CSP*

- Implement JWT authentication, RBAC, input sanitization, secure headers, and API
- Improved initial page load performance by 50% through SSR (Next.js), Lazy Loading, and Code Splitting, reducing Time-to-Interactive from 4.2s to 2.1s.
- Delivered 100% of sprint milestones on time across 12 consecutive sprints by driving Agile Scrum ceremonies, proactive cross-functional communication, and backlog prioritization.
- Implemented an optimized product listing using pagination/virtualization techniques to efficiently handle large datasets.

Scrollx.io — Scalable Web Platform — *Tech Stack: React.js | Next.js | Redux Toolkit*

- Reduced unnecessary re-renders by 70% by optimizing React component architecture using React.memo, useMemo, and useCallback hooks, improving perceived UI responsiveness.
- Eliminated global state complexity by migrating to Redux Toolkit, reducing state management code by 45% while improving predictability and debuggability.

AgreementPaper.com — Document & e-Sign Platform — *Tech Stack: React.js | Next.js*

- Improved document workflow load speed by 40% using dynamic imports, Next.js SSR, and image optimization, enhancing UX for high-traffic document signing sessions.
- Secured document access workflows by implementing token-based route protection, CSP headers, and XSS sanitization, ensuring zero unauthorized access incidents.

Transport360.in — Logistics Management Dashboard — *Tech Stack: React.js*

- Reduced logistics module deployment conflicts by 80% by implementing a Micro Frontend-based dashboard architecture, enabling independent module updates and scaling.
- Improved API security and performance by building Node.js/Express.js backends with JWT middleware, data validation, encryption, and API throttling.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical Engineering

NMU University, Jalgaon, Maharashtra | 2018

CORE COMPETENCIES

Cross-functional Collaboration • Technical Leadership & Code Review • Agile Problem Solving • Attention to Detail (UI/UX Precision) • Clear Communication & Stakeholder Management • Adaptability in Fast-paced Environments
