

RIZWAN KHAN

Senior React.js Developer | React.js • Next.js • Redux Toolkit • TypeScript
anrizwan0305@gmail.com | +91-8237493132 | LinkedIn | Pune / Mumbai, India

PROFESSIONAL SUMMARY

Results-driven Senior React.js Developer with 4+ years of experience architecting and delivering scalable, high-performance web applications using React.js (v16+), Next.js, Redux Toolkit, TypeScript, and modern frontend ecosystems. Deep expertise in component-driven architecture, Micro Frontend design patterns, advanced state management (Redux Toolkit / Redux-Saga / Context API), and UI performance engineering. Consistently drives measurable business outcomes—cutting page load times by up to 50%, reducing bundle sizes by 35%, and improving Lighthouse scores by 20%—through precise memoization, code splitting, SSR, and OWASP-compliant security practices, delivered within Agile (Scrum/Kanban) cross-functional teams.

TECHNICAL SKILLS

Core React: React.js (v16+), React Hooks (useState, useEffect, useRef, useContext), Custom Hooks, React Router, React Portals, Error Boundaries, Compound Components

Advanced React: Next.js (SSR / SSG / ISR), Micro Frontend Architecture, Component-Driven Development, Render Optimization, React Profiler, React DevTools

State Management: Redux Toolkit (RTK), RTK Query, Redux-Saga, React-Redux, Context API

Languages & Markup: JavaScript (ES6+), TypeScript, HTML5, CSS3

Styling & UI: Tailwind CSS, MUI (Material UI), Bootstrap, Responsive Design, WCAG Accessibility Standards

Performance: Code Splitting, Lazy Loading, Memoization (useMemo / useCallback / React.memo), Webpack, Vite, Babel, Lighthouse Audits, Core Web Vitals Optimization

API Integration: RESTful APIs, GraphQL (Apollo Client), Axios, Fetch API, WebSockets, Centralized Error Handling, Request Interceptors

Security (Frontend): JWT Authentication, OAuth 2.0, RBAC, XSS / CSRF Prevention, CSP Headers, Input Validation & Sanitization, OWASP Top 10

Testing & Quality: Jest, React Testing Library, ESLint, Prettier, Code Reviews

DevOps & Tools: Git, GitHub, GitLab, CI/CD Pipelines, Docker, AWS (S3, EC2), JIRA, Figma, Adobe XD, NPM / Yarn

Methodologies: Agile (Scrum, Kanban), Sprint Planning, Backlog Management, Cross-Functional Collaboration

AI Tools: GitHub Copilot, ChatGPT, Gemini

PROFESSIONAL EXPERIENCE

NGI Ventures (NextGen Invent) | Software Engineer | Oct 2024 – Nov 2025 | Remote

- Architected a shared, reusable component library of 50+ React components aligned with Figma design systems, accelerating UI delivery by 30% and ensuring pixel-perfect, consistent interfaces across distributed engineering teams.
- Engineered a migration from legacy Redux patterns to Redux Toolkit (RTK) and RTK Query, improving state management efficiency by 40%, eliminating redundant API calls, and reducing boilerplate code by over 60%.
- Optimized frontend bundle size by 35% via React Lazy Loading, Code Splitting, and Webpack strategies, driving a 20% improvement in Lighthouse performance scores across all production modules.
- Fortified React applications against XSS/CSRF vulnerabilities by enforcing JWT-based route protection, RBAC, CSP headers, and strict input sanitization—achieving full OWASP Top 10 compliance and passing third-party audits.
- Delivered 100% of frontend sprint milestones on time over 12 consecutive Agile Scrum sprints, reducing post-deployment bug reports by 25% through structured peer code reviews and backlog grooming.

Eminence Infotech Pvt. Ltd. | React.js Developer | Aug 2022 – Oct 2024 | Indore

- Slashed page load times by 45% across 3 production React apps by applying Memoization (React.memo, useMemo, useCallback), Lazy Loading, and SSR via Next.js—improving user retention and Core Web Vitals scores.
- Reduced UI revision cycles by 30% by translating 100% of Figma/Adobe XD designs into responsive, pixel-perfect React interfaces using Tailwind CSS and MUI across 5+ projects.
- Accelerated API integration turnaround by 50% by engineering standardized Axios service layers with centralized error handling, loading states, and request interceptors—adopted across 4 internal product teams.

Aplite Info Solution Pvt. Ltd. | **Frontend Developer** | Nov 2021 – Jul 2022 | Indore

- Developed and maintained responsive Javascript UI components for client-facing web applications, maintaining a defect escape rate below 5% and consistently shipping production-ready code on schedule.
- Contributed to 10+ feature enhancements using JavaScript (ES6+), collaborating closely with senior developers on component architecture, REST API consumption via Axios, and Git-based version control workflows.
- Gained hands-on expertise in CSS3 styling, and cross-browser compatibility, accelerating page rendering and improving UI consistency across multiple client projects.

KEY PROJECTS & ACHIEVEMENTS

Unison Marketplace — Government Procurement Platform — Tech Stack: *React.js | Next.js | TypeScript | Redux Toolkit | MUI | JWT | CSP | OWASP Top 10*

- Reduced independent feature deployment time by 60% by architecting a Micro Frontend system with modular React applications, enabling parallel team workflows and zero breaking changes between modules.
- Improved initial page load performance by 50%, cutting Time-to-Interactive from 4.2s to 2.1s, through SSR (Next.js), React Lazy Loading, Code Splitting, and image optimization techniques.
- Achieved full OWASP Top 10 compliance on the React frontend by implementing JWT-based route protection, RBAC guards, input sanitization across all forms, and strict CSP headers—resulting in zero XSS/CSRF incidents post-launch.

Scrollx.io — Scalable SaaS Web Platform — Tech Stack: *React.js | Next.js | TypeScript | Redux Toolkit | RTK Query | Tailwind CSS | Axios*

- Reduced unnecessary re-renders by 70% by deeply optimizing React component architecture using React.memo, useMemo, and useCallback hooks, significantly improving perceived UI responsiveness and Lighthouse performance scores.
- Eliminated global state complexity by migrating from legacy Redux to Redux Toolkit with RTK Query, reducing state management code by 45% and cutting redundant API calls—improving developer experience and application debuggability.
- Engineered a scalable, modular React codebase using custom hooks, compound component patterns, and lazy-loaded routes, enabling the team to ship new features 35% faster without regressions.

AgreementPaper.com — Document & e-Sign Platform — Tech Stack: *React.js | Next.js | TypeScript | Tailwind CSS | JWT | CSP*

- Improved document workflow load speed by 40% using dynamic imports, Next.js SSR, and React-level image optimization, enhancing UX for high-traffic document signing sessions at scale.
- Secured all React-rendered document access workflows by implementing token-based route protection, CSP headers, and client-side XSS sanitization, ensuring zero unauthorized access incidents platform-wide.

Transport360.in — Logistics Management Dashboard — Tech Stack: *React.js | Next.js | Redux Toolkit | Micro Frontend | Tailwind CSS | Axios*

- Reduced logistics module deployment conflicts by 80% by implementing a Micro Frontend-based React dashboard architecture, enabling independent module updates and horizontal UI scaling without cross-team coordination overhead.
- Optimized React dashboard rendering performance by leveraging virtualized lists, memoized selectors, and debounced state updates, sustaining smooth 60fps interactions across data-heavy logistics views.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical Engineering

NMU University, Jalgaon, Maharashtra | 2018

CORE COMPETENCIES

React Architecture & Component Design • Frontend Performance Engineering • Advanced State Management • Micro Frontend Systems • UI/UX Precision & Accessibility (WCAG) • Technical Leadership & Code Review • Agile Cross-Functional Collaboration • Application Security (OWASP) • Mentoring & Knowledge Sharing
