

RIZWAN KHAN

MERN Stack Developer | React.js • Node.js • Express.js • MongoDB
anrizwan0305@gmail.com | +91-8237493132 | LinkedIn | Pune / Mumbai, India

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with 4+ years of experience architecting and delivering scalable, high-performance web applications using MongoDB, Express.js, React.js, and Node.js. Proven expertise in building end-to-end product features — from crafting performant React frontends with Redux Toolkit and Next.js, to designing robust RESTful APIs and microservices with Node.js/Express, and optimizing MongoDB databases for high-traffic workloads. Consistently drives measurable outcomes — cutting API response times by up to 63%, reducing page load times by 45%, and achieving 99.8% uptime SLAs — through full-stack engineering, OWASP-compliant security, and Agile (Scrum/Kanban) delivery.

TECHNICAL SKILLS

Frontend: React.js (v16+), Next.js (SSR / SSG / ISR), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, MUI, Bootstrap, Micro Frontend Architecture

State Management: Redux Toolkit (RTK), RTK Query, Redux-Saga, React-Redux, Context API, Zustand

Backend: Node.js, Express.js, RESTful API Design, GraphQL, Middleware Architecture, API Rate Limiting

Databases: MongoDB, Mongoose ODM, Aggregation Pipelines, Indexing & Query Optimization, PostgreSQL, MySQL

Authentication & Security: JWT, OAuth 2.0, RBAC, OWASP Top 10, XSS / CSRF Prevention, CSP Headers, Input Validation & Sanitization, bcrypt

Performance: Code Splitting, Lazy Loading, Memoization (useMemo / useCallback / React.memo), Webpack, Vite, Lighthouse Audits, Core Web Vitals

Cloud & DevOps: AWS (S3), Docker, Git, GitHub, GitLab, CI/CD Pipelines, NPM / Yarn

Testing & Quality: Jest, React Testing Library, Postman, ESLint, Prettier, Code Reviews

Tools & Collaboration: JIRA, Figma, Adobe XD, Agile (Scrum, Kanban), Sprint Planning, Backlog Management

AI Tools: GitHub Copilot, ChatGPT, Gemini, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

NGI Ventures (NextGen Invent) | Software Engineer | Oct 2024 – Nov 2025 | Remote

- Architected and delivered full-stack features end-to-end using React.js on the frontend and Node.js/Express.js on the backend, accelerating feature delivery by 30% while maintaining pixel-perfect UI alignment with Figma design systems.
- Engineered high-performance RESTful APIs with Node.js and Express.js, integrating Redux-Saga for async data orchestration on the client and achieving a 99.8% uptime SLA across all client-facing data workflows.
- Optimized MongoDB database performance by redesigning schema structures, applying strategic indexing, and leveraging aggregation pipelines — reducing average API response time from 800ms to under 300ms (63% improvement).
- Fortified the full stack against XSS/CSRF vulnerabilities by implementing JWT authentication, RBAC middleware on Express routes, CSP headers, and strict input sanitization — achieving full OWASP Top 10 compliance and passing third-party security audits.
- Reduced frontend bundle size by 35% via React Lazy Loading, Code Splitting, and Webpack optimization, driving a 20% improvement in Lighthouse performance scores while delivering 100% of sprint milestones on time over 12 consecutive Agile Scrum sprints.

Eminence Infotech Pvt. Ltd. | MERN Stack Developer | Aug 2022 – Oct 2024 | Indore

- Built and maintained scalable RESTful APIs using Node.js and Express.js with centralized error handling, request validation middleware, and rate limiting — reducing API integration turnaround by 50% across 5+ projects.
- Slashed page load times by 45% across 3 production web apps by applying React Memoization (React.memo, useMemo, useCallback), Lazy Loading, and SSR via Next.js — improving user retention and Core Web Vitals scores.
- Improved MongoDB query performance by 25% through schema redesign and strategic indexing, cutting average API response time from 800ms to 300ms and supporting high-traffic production workloads reliably.
- Translated 100% of Figma/Adobe XD designs into responsive, pixel-perfect React interfaces using Tailwind CSS and MUI, reducing UI revision cycles by 30% across 4 internal product teams.

- Built a library of 30+ reusable, WCAG-accessible React components and standardized Express middleware patterns, reducing duplicate development effort by 40% and accelerating junior developer onboarding.

Aplite Info Solution Pvt. Ltd. | Frontend Developer | Nov 2021 – Jul 2022 | Indore

- Developed and maintained responsive React.js UI components for client-facing web applications, consuming RESTful APIs via Axios and maintaining a defect escape rate below 5%.
- Contributed to 10+ feature enhancements using React.js and JavaScript (ES6+), collaborating with senior developers on component architecture, REST API integration, and Git-based version control workflows.
- Built foundational proficiency in Node.js/Express API consumption, React Hooks, and MongoDB data modelling — forming the technical foundation for full-stack MERN development.

KEY PROJECTS & ACHIEVEMENTS

Unison Marketplace — Government Procurement Platform — Tech Stack: *React.js | Next.js | Node.js | Express.js | MongoDB | TypeScript | Redux Toolkit | JWT | OWASP*

- Architected a full-stack Micro Frontend system with modular React apps on the frontend and independent Node.js/Express microservices on the backend, reducing feature deployment time by 60% with zero breaking changes.
- Improved initial page load by 50% (TTI: 4.2s → 2.1s) via Next.js SSR, Code Splitting, and Lazy Loading, while achieving full OWASP Top 10 compliance through JWT auth, RBAC, input sanitization, and CSP headers.

Scrollx.io — Scalable SaaS Web Platform — Tech Stack: *React.js | Next.js | Node.js | Express.js | MongoDB | Redux Toolkit | RTK Query | AWS*

- Engineered scalable RESTful API endpoints with Node.js & Express.js backed by optimized MongoDB queries and indexing, achieving sub-200ms API response times under high-traffic production loads.
- Reduced unnecessary React re-renders by 70% via React.memo, useMemo, and useCallback, and eliminated global state complexity by migrating to Redux Toolkit — cutting state management code by 45%.

AgreementPaper.com — Document & e-Sign Platform — Tech Stack: *React.js | Next.js | Node.js | Express.js | MongoDB | TypeScript | JWT | CSP*

- Delivered a secure, end-to-end document signing workflow — building Express.js API routes with JWT middleware and MongoDB document storage on the backend, and optimizing React frontend load speed by 40% via SSR and dynamic imports.
- Implemented token-based route protection on both Express backend and React frontend, with CSP headers and XSS sanitization — ensuring zero unauthorized access incidents platform-wide.

Transport360.in — Logistics Management Dashboard — Tech Stack: *React.js | Next.js | Node.js | Express.js | MongoDB | Micro Frontend | Redux Toolkit*

- Reduced logistics module deployment conflicts by 80% by implementing a full-stack Micro Frontend architecture — independent React modules on the frontend backed by dedicated Node.js/Express services per domain.
- Built Node.js/Express backend APIs with JWT middleware, MongoDB aggregation pipelines for real-time logistics reporting, and API throttling — while optimizing React dashboard rendering with virtualized lists and memoized selectors.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical Engineering

NMU University, Jalgaon, Maharashtra | 2018

CORE COMPETENCIES

Full-Stack MERN Architecture • RESTful API Design & Optimization • MongoDB Schema & Query Engineering • React Performance Engineering • Application Security (OWASP) • Micro Frontend Systems • Technical Leadership & Code Review • Agile Cross-Functional Collaboration • Mentoring & Knowledge Sharing
