

RIZWAN KHAN

Senior Full-Stack Developer | React.js & Node.js

anrizwan0305@gmail.com | +91-8237493132 | LinkedIn | Indore, India

PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Developer with 5+ years of experience architecting and delivering scalable, high-performance web applications using React.js (v16+) and Node.js. Deep expertise in component-driven architecture, state management (Redux Toolkit / Redux-Saga / Context API), RESTful API development, and Micro Frontend design patterns. Proven track record of optimizing frontend performance, enforcing application security (OWASP Top 10, JWT, RBAC), and driving measurable business outcomes in product-based and startup environments. Adept at cross-functional collaboration using Agile (Scrum/Kanban) methodologies.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js (v16+), Next.js, React Hooks, Micro Frontend Architecture, HTML5, CSS3, Tailwind CSS, MUI, Bootstrap

State Management: Redux Toolkit (RTK), Redux-Saga, React-Redux, Context API

Backend & APIs: Node.js, Express.js, RESTful APIs, Axios, Fetch API, Middleware Design, API Rate Limiting

Performance: Code Splitting, Lazy Loading, Memoization (useMemo/useCallback/React.memo), SSR (Next.js), Lighthouse Audits, React Profiler, Webpack, Vite, Babel

Security: JWT Authentication, RBAC, OWASP Top 10, XSS/CSRF Prevention, CSP Headers, Input Validation & Sanitization

Databases: MongoDB, PostgreSQL (Query Optimization, Indexing)

Testing & Quality: Jest, ESLint, Prettier, Code Reviews

DevOps & Tools: Git, GitHub, GitLab, Bitbucket, JIRA, Figma, Adobe XD, Webpack, NPM/Yarn

AI Tools: GitHub Copilot, ChatGPT, Gemini

Methodologies: Agile (Scrum, Kanban), Backlog Management, Sprint Planning, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

NGI Ventures (NextGen Invent) | **Software Engineer** | Oct 2024 – Nov 2025 | Remote

- Reduced average bundle size by 35% by implementing React Lazy Loading, Code Splitting, and Webpack optimization strategies, resulting in a 20% improvement in Lighthouse performance scores across all production modules.
- Improved state management efficiency by 40% by migrating legacy Redux patterns to Redux Toolkit (RTK) and RTK Query, eliminating redundant API calls and cutting boilerplate by over 60%.
- Accelerated UI delivery by 30% by architecting a shared reusable component library (50+ components) aligned with Figma design systems, enabling consistent, pixel-perfect interfaces across teams.
- Boosted cross-team code quality by leading structured peer code reviews resulting in a 25% reduction in post-deployment bug reports over two quarters.

- Eliminated critical XSS/CSRF vulnerabilities by implementing JWT-based authentication, RBAC middleware, and Content Security Policies (CSP), achieving full OWASP Top 10 compliance.
- Enhanced API reliability by integrating RESTful APIs and managing async operations via Redux-Saga, achieving a 99.8% uptime SLA for client-facing data workflows.
- Delivered 100% of sprint milestones on time over 12 consecutive sprints by driving Agile Scrum ceremonies, backlog grooming, and proactive cross-functional communication.

Eminence Infotech Pvt. Ltd. | **React.js Developer** | *Aug 2022 – Oct 2024* | **Indore**

- Cut page load time by 45% across 3 production web apps by applying Memoization (React.memo, useMemo, useCallback), Lazy Loading, and Server-Side Rendering (Next.js), resulting in a measurable improvement in user retention.
- Reduced API integration turnaround by 50% by creating standardized Axios service layers with centralized error handling, loading states, and request interceptors, used across 5+ projects.
- Translated 100% of Figma/Adobe XD designs into responsive, pixel-perfect layouts using Tailwind CSS and MUI, reducing UI revision cycles by 30%.
- Improved code reusability by building a library of 30+ accessible React components following WCAG accessibility standards, adopted across 4 internal product teams.
- Enhanced database query performance by 25% through MongoDB schema optimization and strategic indexing, reducing average API response time from 800ms to 300ms.

GrowingBiz | **Frontend Developer** | *Sep 2020 – Aug 2022* | **Mumbai**

- Contributed to 15+ feature enhancements and bug fixes under senior developer guidance using React.js and JavaScript (ES6+), maintaining a defect escape rate below 5%.
- Improved product stability by supporting QA testing cycles and resolving an average of 20 bugs/sprint, accelerating release velocity by 15%.
- Gained foundational expertise in component architecture, REST API consumption, and version control (Git/GitHub) in a fast-paced startup environment.

KEY PROJECTS & ACHIEVEMENTS

Unison Marketplace — Government Procurement Platform — *Tech Stack: React.js | Next.js | TypeScript | MUI | OWASP 10 | CSP*

- Reduced independent feature deployment time by 60% by architecting a Micro Frontend system with modular React apps, enabling parallel team workflows without breaking changes.
- Achieved OWASP Top 10 compliance by implementing JWT authentication, RBAC, input sanitization, secure headers, and API rate limiting, passing third-party security audits.
- Improved initial page load performance by 50% through SSR (Next.js), Lazy Loading, and Code Splitting, reducing Time-to-Interactive from 4.2s to 2.1s.
- Maintained zero XSS/CSRF incidents post-launch by enforcing strict Content Security Policies and comprehensive input validation across all user-facing forms.

Scrollx.io — Scalable Web Platform — *Tech Stack: React.js | Next.js | Node.js | Express.js | AWS Redux Toolkit*

- Reduced unnecessary re-renders by 70% by optimizing React component architecture using React.memo, useMemo, and useCallback hooks, improving perceived UI responsiveness.
- Achieved sub-200ms API response times by building scalable RESTful API endpoints with Node.js & Express.js, combined with efficient MongoDB query design and indexing.
- Eliminated global state complexity by migrating to Redux Toolkit, reducing state management code by 45% while improving predictability and debuggability.

AgreementPaper.com — Document & e-Sign Platform — *Tech Stack: React.js | Next.js | TypeScript*

- Improved document workflow load speed by 40% using dynamic imports, Next.js SSR, and image optimization, enhancing UX for high-traffic document signing sessions.
- Secured document access workflows by implementing token-based route protection, CSP headers, and XSS sanitization, ensuring zero unauthorized access incidents.

Transport360.in — Logistics Management Dashboard — *Tech Stack: React.js | Next.js | Node.js | Express.js*

- Reduced logistics module deployment conflicts by 80% by implementing a Micro Frontend-based dashboard architecture, enabling independent module updates and scaling.
- Improved API security and performance by building Node.js/Express.js backends with JWT middleware, data validation, encryption, and API throttling.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical Engineering

NMU University, Jalgaon, Maharashtra | 2018

CORE COMPETENCIES

Cross-functional Collaboration • Technical Leadership & Code Review • Agile Problem Solving • Attention to Detail (UI/UX Precision) • Clear Communication & Stakeholder Management • Adaptability in Fast-paced Environments
