

RIZWAN KHAN

React.js Developer | 4.7 Years Experience | Immediate Joiner

Next.js • Redux Toolkit • TypeScript • Micro Frontend Architecture

Pune, Maharashtra (open to Pune / Remote) | anrizwan0305@gmail.com | +91-8237493132 | [linkedin](#)

PROFESSIONAL SUMMARY

Immediate joiner with 4.7 years of experience as a React.js Developer, specializing in React.js (v16+), Next.js, Redux Toolkit, and TypeScript. Proven record of shipping scalable, high-performance web applications — cutting page load times by up to 50%, reducing bundle sizes by 35%, and improving Lighthouse scores by 20% through memoization, code splitting, SSR, and OWASP-compliant security practices. Experienced in Agile/Scrum teams, component-driven architecture, and Micro Frontend systems.

KEY SKILLS

Core React: React.js (v16+), React Hooks, Custom Hooks, React Router, React Portals, Error Boundaries, Compound Components

Next.js / Advanced React: SSR, SSG, ISR, Micro Frontend Architecture, Component-Driven Development, React Profiler, React DevTools

State Management: Redux Toolkit (RTK), RTK Query, Redux-Saga, React-Redux, Context API

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Styling & UI: Tailwind CSS, MUI, Bootstrap, Responsive Design, WCAG Accessibility

Performance: Code Splitting, Lazy Loading, Memoization (useMemo/useCallback/React.memo), Webpack, Vite, Babel, Core Web Vitals

API Integration: REST APIs, GraphQL (Apollo Client), Axios, Fetch API, WebSockets, Request Interceptors

Security: JWT, OAuth 2.0, RBAC, XSS/CSRF Prevention, CSP Headers, OWASP Top 10

Testing & Quality: Jest, React Testing Library, ESLint, Prettier, Code Reviews

DevOps & Tools: Git, GitHub, GitLab, CI/CD, Docker, AWS (S3, EC2), JIRA, Figma

Methodologies: Agile (Scrum, Kanban), Sprint Planning, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer — NGI Ventures (NextGen Invent)

Oct 2024 – Nov 2025 | Remote

- Architected a shared, reusable component library of 50+ React components aligned with Figma design systems, accelerating UI delivery by 30% across distributed engineering teams.
- Migrated legacy Redux patterns to Redux Toolkit (RTK) and RTK Query, improving state management efficiency by 40% and reducing boilerplate code by over 60%.
- Optimized frontend bundle size by 35% via Lazy Loading, Code Splitting, and Webpack strategies, driving a 20% improvement in Lighthouse performance scores.
- Fortified applications against XSS/CSRF vulnerabilities via JWT-based route protection, RBAC, and CSP headers — achieving full OWASP Top 10 compliance.
- Delivered 100% of frontend sprint milestones over 12 consecutive Agile Scrum sprints, reducing post-deployment bug reports by 25%.

React.js Developer — Eminence Infotech Pvt. Ltd.

Aug 2022 – Oct 2024 | Indore

- Cut page load times by 45% across 3 production React apps using Memoization, Lazy Loading, and SSR via Next.js — improving Core Web Vitals scores.
- Reduced UI revision cycles by 30% by translating Figma/Adobe XD designs into responsive, pixel-perfect interfaces using Tailwind CSS and MUI across 5+ projects.
- Accelerated API integration turnaround by 50% by building standardized Axios service layers with centralized error handling, adopted across 4 internal product teams.

Frontend Developer — Aplite Info Solution Pvt. Ltd.

Nov 2021 – Jul 2022 | Indore

- Developed and maintained responsive JavaScript UI components for client-facing web applications, maintaining a defect escape rate below 5%.
- Delivered 10+ feature enhancements using JavaScript (ES6+), collaborating on component architecture, REST API consumption via Axios, and Git-based workflows.
- Built hands-on expertise in CSS3 styling and cross-browser compatibility, improving UI consistency across client projects.

KEY PROJECTS

Unison Marketplace — Government Procurement Platform

React.js | Next.js | TypeScript | Redux Toolkit | MUI | JWT | CSP | OWASP Top 10

- Reduced independent feature deployment time by 60% by architecting a Micro Frontend system enabling parallel team workflows with zero breaking changes.
- Improved initial page load performance by 50%, cutting Time-to-Interactive from 4.2s to 2.1s, via SSR, Lazy Loading, and image optimization.
- Achieved full OWASP Top 10 compliance with JWT route protection, RBAC guards, and strict CSP headers — zero XSS/CSRF incidents post-launch.

Scrollx.io — Scalable SaaS Web Platform

React.js | Next.js | TypeScript | Redux Toolkit | RTK Query | Tailwind CSS | Axios

- Reduced unnecessary re-renders by 70% via React.memo, useMemo, and useCallback, improving Lighthouse performance scores.
- Migrated legacy Redux to Redux Toolkit with RTK Query, reducing state management code by 45% and cutting redundant API calls.

AgreementPaper.com — Document & e-Sign Platform

React.js | Next.js | TypeScript | Tailwind CSS | JWT | CSP

- Improved document workflow load speed by 40% using dynamic imports, Next.js SSR, and image optimization.
- Secured document access workflows with token-based route protection, CSP headers, and client-side XSS sanitization.

Transport360.in — Logistics Management Dashboard

React.js | Next.js | Redux Toolkit | Micro Frontend | Tailwind CSS | Axios

- Reduced logistics module deployment conflicts by 80% via a Micro Frontend-based dashboard architecture enabling independent module updates.
- Sustained smooth 60fps interactions across data-heavy views using virtualized lists, memoized selectors, and debounced state updates.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical Engineering

NMU University, Jalgaon, Maharashtra | 2018

ADDITIONAL INFO

Notice Period: Immediate Joiner

AI Tools: GitHub Copilot, ChatGPT, Gemini
